2019 Annual Point In Time Count Data-Harford County
Overview

- Point-In-Time Data (PIT)
- Project Homeless Connect
- Snapshot

*all data has been compiled using Homeless Management Information Systems (HMIS), real-time participant surveys and shelter surveys and reports*
What Is a Point-In-Time (PIT) Count?

An enumeration of unsheltered and sheltered persons experiencing homelessness on one night during the last 10 days of the calendar month of January in our geographical area.

It is important to note that the PIT count only identifies a subset of individuals and families that meet HUD’s definition of homeless. As such, the PIT count does not capture everybody who is eligible for homeless assistance through HUD or other homeless assistance funding sources.
Who Is Counted?

Individuals and families who are:

- Living on the street, in tents, cars, abandoned buildings
- Emergency shelters
- Transitional housing
- Fleeing domestic violence/DV shelter

- HUD also requires enumeration/estimation of certain key subpopulations: seriously mentally ill, chronic substance abusers, veterans, persons with HIV/AIDS, unaccompanied youth
Why conduct a count?

- Required by the US Dept. of Housing and Community Development (HUD) for all jurisdictions receiving federal funding
- Directs CoC planning to end homelessness
- Demonstrates a need for resources in our Continuum of Care application
- Raises public awareness
- Accurately measures and identifies the needs of the population
- Measures performance in eliminating homelessness
RESULTS
Analysis

19% increase over last year

Increase in sheltered count
- Attributing factors: Increase in size of families being served; more individuals in ERS; overflow beds being used in some programs; increase in family transitional housing units; SARC exceeded capacity

Increase by two in unsheltered count
- Attributing factors: more effective outreach efforts;
